

Gabrielle Coleman

Greenfield, IN • (765) 698-8619 • gabbycoleman96@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented data and operations professional with a track record of handling high-volume, accuracy-critical work in compliance-driven environments. Known for thorough record validation, catching discrepancies before they escalate, and maintaining documentation that holds up under audit. Experienced with HIPAA and PII/PHI regulated systems across state-contracted and corporate settings. Combines strong administrative execution with functional technical skills in Excel, SQL, Tableau, and Power BI. Quick to learn new systems and adapt to evolving workflows. Works well independently in structured, remote-friendly environments.

CORE SKILLS

Data & Records: High-volume data entry, cross-system verification, database management (MySQL), records management, file auditing, data cleaning & validation

Quality & Compliance: QA/QC review, HIPAA compliance, PII/PHI handling, document auditing, process adherence, regulatory tracking

Technical Tools: Excel (advanced formulas), SQL (MySQL), Power BI, Tableau, GitHub, AI-assisted tools

Operations & Admin: Case documentation, intake processing, enrollment tracking, workflow coordination, back-office operations, reporting

WORK EXPERIENCE

Career Coach | **Equus Workforce Solutions**

Aug 2024 — Present

- Manage operational data tracking, case documentation, and compliance records for a caseload of up to 86 active participants within a state-contracted workforce program
- Maintained a verified 94% average accuracy score across complex Quality Assurance (QA) reviews while managing a shifting caseload
- Ranked in the top 5 performance tier organization-wide for program enrollment velocity, outperforming baseline targets by over 20% through meticulous intake data auditing and outreach funnel optimization
- Validate, reconcile, and audit data fields across multiple internal and state databases to keep records accurate and compliant
- Worked directly with corporate compliance auditors to walk through operational workflows; tracking data held up well under external review

Eligibility Specialist | **MAXIMUS**

Mar 2023 — Jul 2024

- Reviewed, validated, and processed large volumes of sensitive state benefits records containing PII and PHI under strict HIPAA and data-privacy requirements
- Ran cross-system data verification across multiple eligibility platforms to surface anomalies and keep database records reliable
- Catch and resolve database sync errors and data discrepancies before they become bigger problems, reducing processing delays across the regional team
- Documented step-by-step procedures and trained 50+ new hires on data systems, quality benchmarks, and accuracy standards

Digital Storefront Owner & Operator | **Etsy Shop**

Jun 2020 — Feb 2023

- Ran end-to-end digital operations solo: inventory datasets, order fulfillment tracking, and transactional records for an active e-commerce business
- Built and maintained spreadsheet systems to track order cycles and keep operations running cleanly

TECHNICAL PROJECTS

Genomic Variant Analysis Project | [GitHub](#)

- Migrated a raw genomic dataset from Excel into a relational MySQL database to handle scale and improve processing reliability
- Cleaned and normalized a 2.4M-record data stream — filtered malformed rows, standardized naming conventions, and resolved data type inconsistencies
- Built a debugging log to track schema adjustments and decimal precision corrections needed for sparse data fields
- Designed Power BI dashboards using aggregate metrics to compare variant density profiles and surface category outliers

Spotify Streaming History Analysis | [Tableau](#)

- Flattened multi-file JSON streaming event logs into a relational MySQL database for structured querying
- Wrote data-cleaning queries to separate intentional listening activity from accidental impressions and automated playback
- Applied time-based filtering to reduce reporting distortion from non-standard listening patterns
- Built Tableau dashboards to analyze content concentration trends and track monthly active usage metrics

EDUCATION & CERTIFICATIONS

Associate in general studies — Ivy Tech Community College

Google AI Professional Certificate

Google Data Analytics Professional Certificate
